### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest, in the claimed combination, a coupling adjusting structure for a double-tuned circuit a first tuned circuit including a first coil formed on first and second surfaces of a printed circuit board and a second tuned circuit comprising a second coil formed by another combination of other first and second conductive patterns formed on first and second surfaces of the printed circuit board wherein the first and second coils are configured such that the conductive patterns formed on the printed circuit board and the corresponding second conductive patterns formed the second surface of the printed circuit board are connected to each other with one end of the first coil and the corresponding end of the second coil disposed close to each other and at least one first ground conductive pattern comprising a first adjusting conductive pattern extending between the first and second coils disposed at least on the first surface of the printed circuit board and the first adjusting conductive pattern is cut by at least one break so as to adjust an inductive coupling of the double-tuned-circuit. Both Igarashi and Japan 4-245410 fail to show the coils of the double tuned inductive coils having a break therebetween to provide a tuning function.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
